

Test Plan - Gardening Store Web

General Information

Project:

Vida Verde

Testing Environment:

 Inicio | Vida Verde

Release / Version:

Sprint of the project in Jira

☒ Team 3 - Gardening Store Web | Releases | 1.0 UNRELEASED

Test Responsible:

Maria Tapia Millán, Karelia Zamorano, Grimanesa Lozano Alvarado

Test Objectives

- Validate the website functionalities corresponding to this version.
- Ensure that recent changes have not introduced errors in existing functionalities.

Test Scope

Devices and Browsers

Desktop: Chrome

Mobile: iPhone 12 Pro, iPhone 14 Pro Max

Tablet: iPad Pro

Functionalities to be tested (User Stories):

Key	Summary	Description	Status
KAN-11	Complete purchase	As a user, I want to complete the purchase of my order. Acceptance Criteria: When there are products in the basket, a "proceed to payment" button will appear, which will take you to the order page, which will contain the following: Order summary, including: ▪ Name of the products with their prices. ▪ Subtotal: sum of the price of all products. ▪ VAT 21%: total VAT applied. ▪ Shipping: 5€	DONE

- Total: total sum of all amounts.

Shipping and payment details form with the following fields and buttons:

- Full name (required).
- Email (required).
- Address (required).
- Valid card number (required). Valid test card: 4242 4242 4242 4242.
- Back to basket button, which will return you to the basket page.

Complete purchase button: if any field in the form is incorrect, an error message will appear; if all the details are correct, a completed order page will appear with the following details:

- Order summary with the name and price of each product, subtotal, 21% VAT, 5 € shipping and total.
- Back to shop button, which will open the products page.
- Back to shop button, which will open the products page.

KAN- Shopping cart
10

As a user,

DONE

I want to have a shopping cart

so I can view my order.

Acceptance criteria:

- There will be a shopping cart icon in the menu that will open the shopping cart page.
- The user can add products to the cart from the product page. When a product is added to the cart, the name, image, category, and price of the added product will appear on the cart page.
- The user can remove products from the cart in two ways: from the product page or from the cart page. When a product is removed from the cart, it will disappear from the cart page.

When there are products in the cart, the following will appear:

A summary of the purchase, which will include:

- The total price of the added products.
- The amount of 21% VAT.
- The shipping cost, which will be €5.
- The total purchase amount, which will be the sum of the products plus VAT plus shipping.
- When products are added to or removed from the cart, the price must be updated.
- An empty cart button that will leave the cart page empty. It will only be available when there are products in the cart.
- A continue shopping link that will open the product page to continue adding products to the cart.
- When the cart is empty, a "View products" button will be displayed that will open the product page.

KAN-9 Contact Page

As a user

DONE

I want a contact form

So that I can get in touch with the shop.

Acceptance Criteria

The contact form must include the following fields:

- **Name** (mandatory)
- **Email** (mandatory, must be a valid email format)
- **Telephone** (optional, must accept numbers and an optional "+" prefix only)
- **Message** (mandatory, maximum 500 characters)

2. Upon successful submission, a confirmation message must be displayed.

3. Error messages must be clearly displayed next to the relevant field. Invalid formats must trigger validation errors.

1. The page must be responsive.

KAN-8 Product Filters

As a user

DONE

I want to filter products

So that I can easily find the ones that meet my needs.

Acceptance Criteria

1. **Filter by name**
 - The system must display products whose name contains the entered text.
2. **Filter by price:** The user can filter by:
 - Minimum price only
 - Maximum price only
 - Price range: Both minimum and maximum price. The system must display products within the specified price range (inclusive).
3. **Filter by category.** Available categories: Plants, Tools and Pots. The system must display only products belonging to the selected category.
4. Filters can be combined.
5. If no products match the selected filters, an informative message must be displayed (e.g. "No products match your selected criteria.").
6. When at least one filter is active, a "Clear filters" option must be visible.
7. When the user selects "Clear filters", all filters must be removed. The full product list must be displayed.
8. If no filters are applied. The "Clear filters" option must not be visible.
9. By default, the product page must load with no filters applied.

KAN-7 Product Listing
Page

As a user
I want to view a product listing page
So that I can see the products offered by the shop.

DONE

Acceptance Criteria

1. The page displays the heading "Our Products".
2. It shows a list of products with the following information: Category, name and Price.
3. The page must be responsive.

KAN-6 About Us Page

As a user

I want to see an About Us page with information about the store's history and values

So that I can better understand the company background and culture

DONE

Acceptance Criteria:

- The page includes a title "About Us".
- The page includes information about the history and values of the store.
- The page displays an image of the team.
- It must be responsive.

KAN-5 Home Page

As a user

I want to see a home page with key information about the store

So that I can quickly understand what the store offers and its purpose

DONE

Acceptance Criteria:

- A title with the name of the store is displayed.
- A description is displayed.
- An image of the store is shown.
- There is a button to open the store's products page.
- It must be responsive.

KAN-4 Navigation Menu

As a user

DONE

I want to see a navigation menu with links to Home, About Us, Products, and Contact

So that I can easily navigate through the website

Acceptance Criteria:

- The menu displays the links: Home, About Us, Products, and Contact.
 - Each link redirects to its corresponding section.
 - The menu is visible on all pages.
 - It must be responsive.
-

8 issues

Entry Criteria

User stories must be deployed in the testing environment and accessible for validation.

Exit Criteria

- All functional tests have been executed.
- No critical errors remain open.
- All regression tests have been successfully completed.

Test Types

Functional Testing

Functional tests were carried out for each user story included in the project in order to verify that the implemented functionalities work according to the defined acceptance criteria.

Regression Testing

Regression testing is performed before each release and after applying changes or fixes to ensure that existing functionalities have not been affected.

Exploratory Testing

Exploratory tests were performed by navigating through the application without strictly following formal test cases, with the aim of identifying potential issues not covered by predefined scenarios.

Responsibilities

QAs – Maria Tapia Millán, Karelia Zamorano, Grimanesa Lozano Alvarado:

Design and execute tests, report detected issues in Jira, and document test results.

Development:

The website functionalities are already implemented in the testing environment provided for the bootcamp. Detected issues are registered in Jira as part of the practical testing exercise.

Tools and Test Data

Test Management:

AssertThat

Bug Reporting:

Jira

Automation:

[Playwright](#)

Test Data:

Test Card: 4242-4242-4242-4242

Communication and Reporting

All issues detected during testing are recorded and managed in Jira.

A summary of the test results and detected issues is documented in Confluence as part of the project's test documentation process.

Test Results

Functional test results executed: [\[Funtional Tests Results GitHub\]](#) [\[Functional Tests Results JIRA\]](#)

Regression test results executed: [Regression Test Execution Results \(Playwright Automation\)](#)

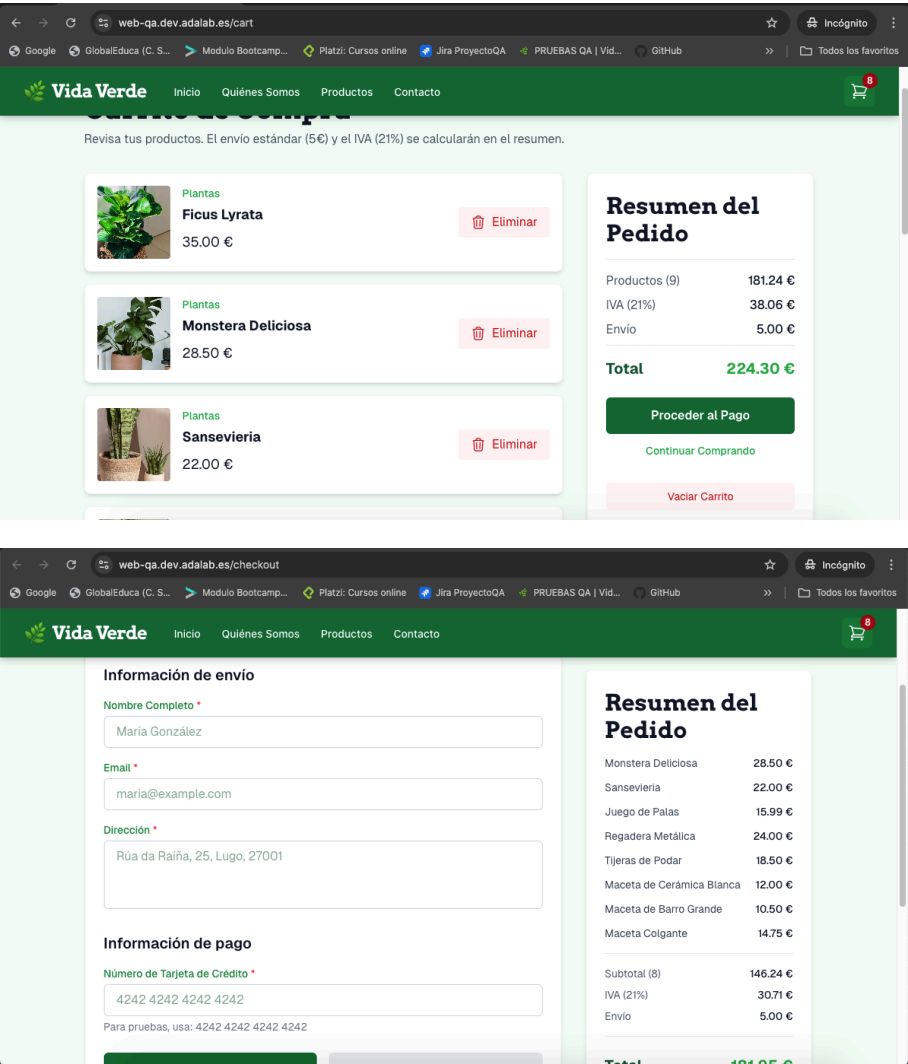

Bug Reporting

All issues detected during functional, exploratory, and regression testing were recorded in the issue management system.

Key	Summary	Description
KAN-31	Complete Purchase – Products missing from Order Summary	Steps to reproduce: Given the user is on the Shopping Cart page When the user clicks the Proceed to Checkout button Then the webpage should display an Order Summary with all the products added to the cart

(Google
Chrome)

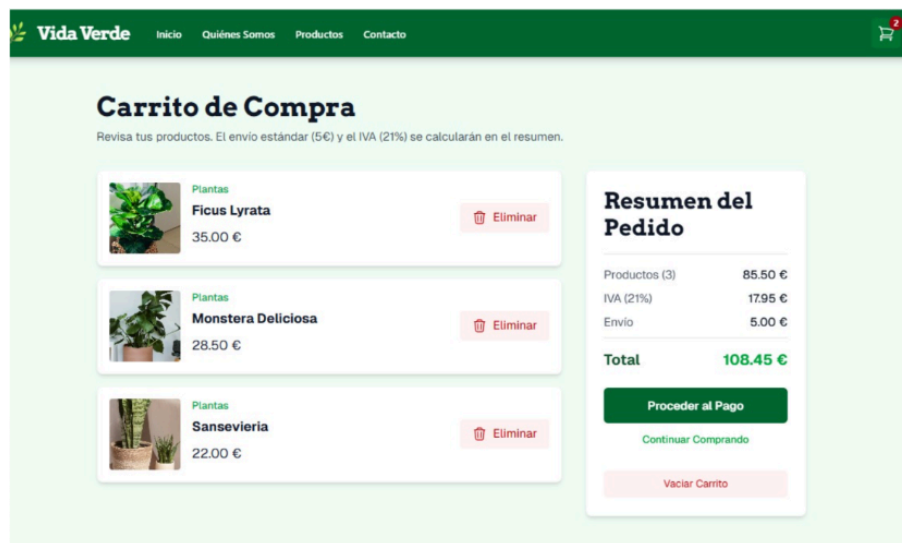

Actual result:
After the user clicks the Proceed to Checkout button, the webpage removes one item from the Order Summr that was previously in the cart.

Expected result:
When the user clicks the Proceed to Checkout button, the webpage should keep all the products that were added to the cart.
Additional information: Browser: Google Chrome. Desktop version. Mobile: iPhone 14 Pro Max, works corre

KAN- Shopping
30 cart -
[Desktop
Chrome]
The
shopping
cart icon
does not
update the
product
count

Steps to reproduce:
Given the user is on the website
When the user adds a product to the shopping cart
Actual Result:
The number of products displayed in the shopping cart icon is incorrect

Expected result:

The shopping cart icon displays the correct number of products added to the cart

Additional Information:

Browser Chrome. Desktop Version

KAN-29 The cart loses products when refreshing the page or opening it in a new tab

Description

The cart does not retain the products added by the user. When refreshing the cart page or opening it in a new browser tab, some items disappear randomly. This causes inconsistencies in the checkout process and may prevent the user from completing the purchase correctly.

Steps to Reproduce

1. Add several products to the cart.
2. Open the cart and verify that all items are displayed.
3. **Refresh the cart page.**
4. Observe that some products are missing.
5. Go back to the product listing and add more items.
6. Open the cart in a **new browser tab** (right-click → open in new tab).
7. Verify that products disappear again.

Actual Result

The cart loses products when the page is refreshed or when the cart is opened in a new tab. The cart state is not preserved.

Expected Result

The cart should retain all added products, regardless of whether the page is refreshed or opened in a new tab.

Additional Information:

Browser Chrome

KAN-28 Product filter error – Price filters do not validate the minimum and

Steps to reproduce:

Given the user is on the Products page

When the user enters "100" as the minimum price

And the user enters "50" as the maximum price

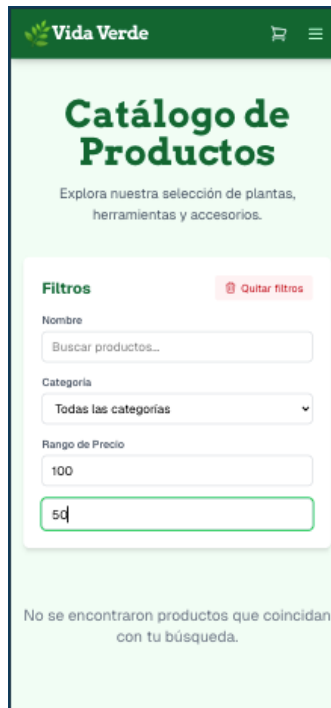

maximum
values

Then an error message should be displayed

And the filters should not be applied

Actual result:

When the user enters 100 as the minimum price and 50 as the maximum price, the webpage does not display an error message. Instead, the message "No products were found matching your search" is displayed, even though the maximum price is lower than the minimum price.

Expected result:

The webpage should display an error message when the price entered as the minimum price is higher than maximum price, and the filters should not be applied.

Additional information:

Browser: Google Chrome. Desktop version.

Mobile: iPhone 14 Pro Max.

KAN-
26 Product filter
error –
Maximum
price filter
does not

Steps to reproduce:

Given the user is on the Products page

When the user enters "50" as the maximum price

display
results

Then only products with price less than or equal to "50" should be displayed

Actual result:

The webpage does not display any products when 50 is entered as the maximum price on both desktop and mobile devices.

The message "No products were found matching your search" is displayed, even though there are products that match the selected price.

Expected result:

The webpage should display products with a price lower than or equal to the value entered in the maximum price field.

Additional information:

Browser: Google Chrome. Desktop version.

Mobile: iPhone 14 Pro Max.

KAN-
25 Clear filter
error – Clear
Filters
button does
not remove
some
applied
filters

Steps to reproduce:

Given user is on the products page

When they apply the following filters:

name: Ficus

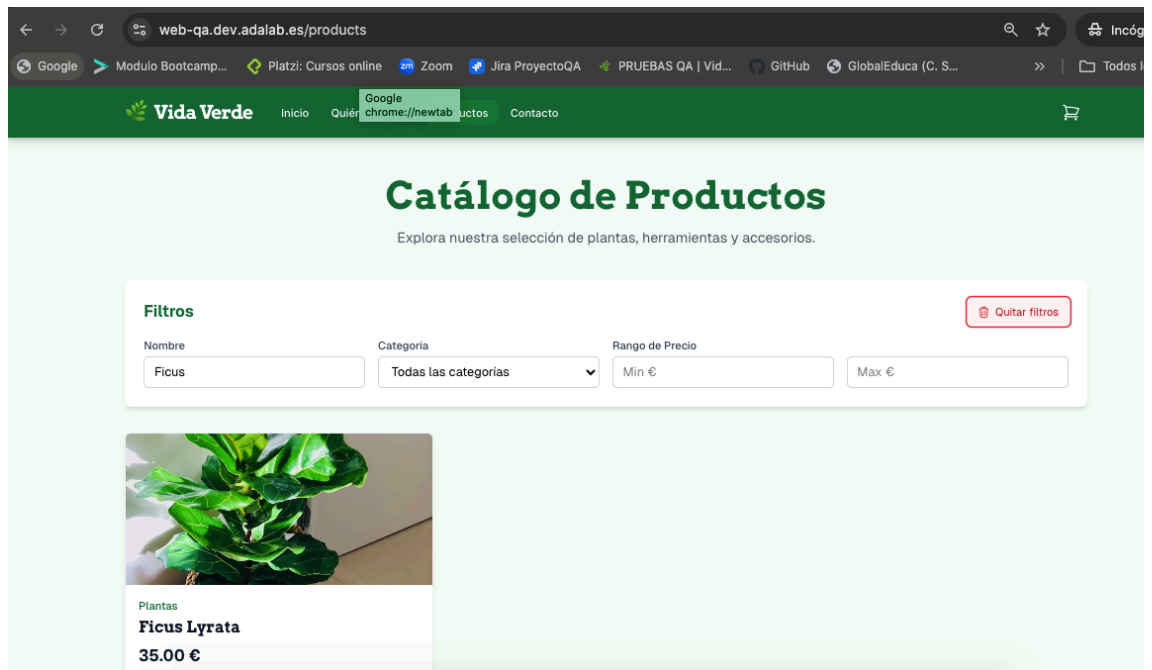

category: Plants

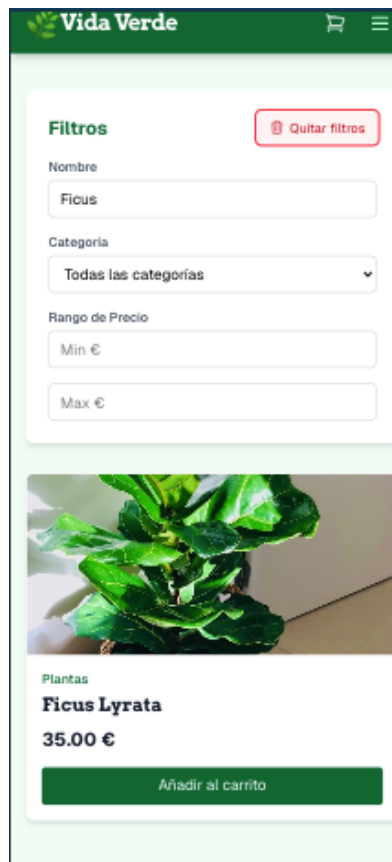

Min price: 10

Max price 50
And clicks on clear filters

Actual result:

Then all filters except name are cleared and Clear Filter button remains visible.

Expected result:

The Clear Filters button should remove all applied filters, whether one filter or multiple filters are applied. After the filters are removed, the Clear Filters button should disappear and the full product list should be displayed.

Additional information:

Browser: Google Chrome. Desktop version.

Mobile: iPhone 14 Pro Max.

KAN-24
Product filter error - Using Minimum and maximum price filter does not display results

Steps to reproduce:

Given the user is on the Products page

When the user enters "10" as the minimum price

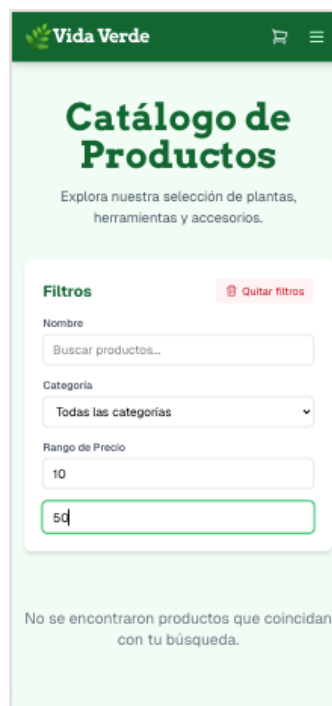

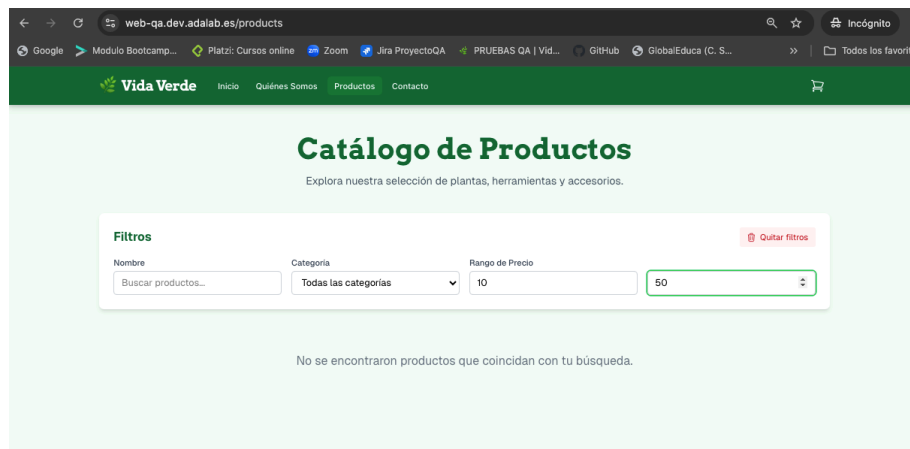

And the user enters "50" as the maximum price

Then only products with a price between "10" and "50" inclusive should be displayed

Actual result:

The webpage does not display any products between 10 and 50, on both desktop and mobile devices.

The message "No products were found matching your search" is displayed, even though there are products that match the selected prices.

Expected result:

The webpage should display products with prices within the range entered in the minimum and maximum p fields.

Additional information:

Browser: Google Chrome. Desktop version.

Mobile: iPhone 14 Pro Max.

KAN-23 Product filter error – Minimum price filter does not display results

Steps to reproduce:

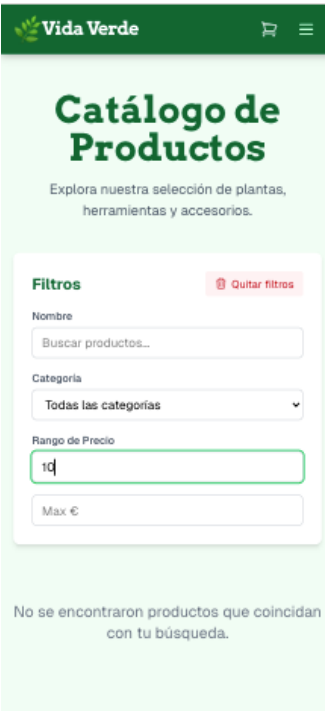

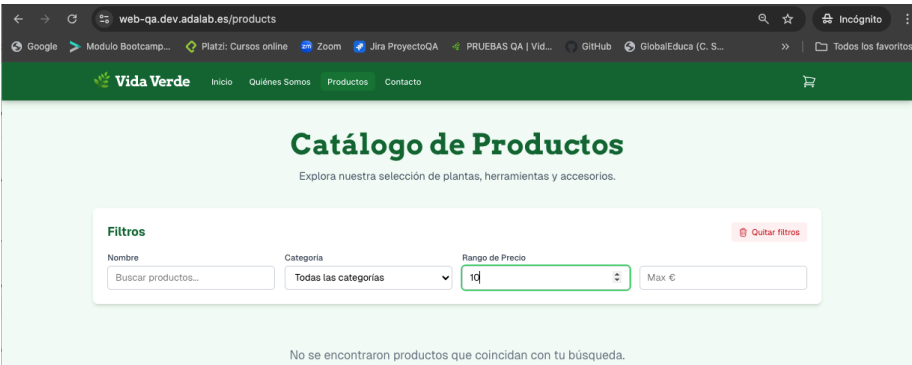

Given the user is on the Products page

When the user enters “10” as the minimum price

Actual result:

The webpage does not display any products when 10 is entered as the minimum price on both desktop and mobile devices.

The message “No products were found matching your search” is displayed, even though there are products that match the selected price.

Expected result:

The webpage should display products with a price greater than or equal to the value entered in the minimum price field.

Additional information:

Browser: Google Chrome. Desktop version.

Mobile: iPhone 14 Pro Max.

KAN-21 About Us Page – [Mobile] About Us page returns 404 error

Steps to reproduce:

Given the user opens the About Us page on a mobile device

Actual Result:

A 404 Not Found error page is displayed instead of the About Us page

Expected result:

The About Us page loads correctly on mobile phones

Additional Information:

This only happens in the mobile version. Works on Desktop.

Mobile Version (Iphone 12 Pro)

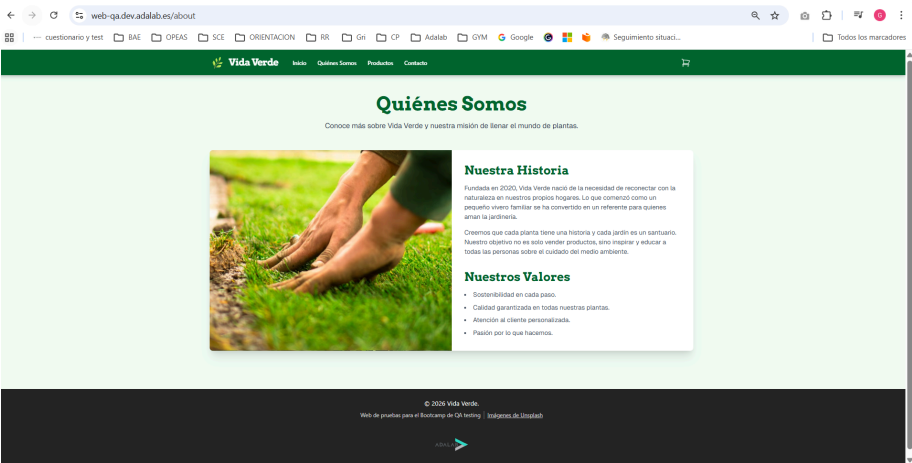

KAN-20 About Us Page – [Desktop Chrome] Team image is not displayed

Steps to reproduce:

Given the user opens the About Us page <https://web-qa.dev.adalab.es/about>

Actual Result:

The team image is not displayed on the About Us page

Expected result:

The About Us page displays the team image

Additional Information:

Browser Chrome. Desktop Version

Mobile Version (Iphone 12 Pro)

KAN-19 Complete Purchase: Incorrect total amount

Steps to Reproduce

Complete a purchase that includes:

- Product price: 35.00 €

calculated in
order
confirmation

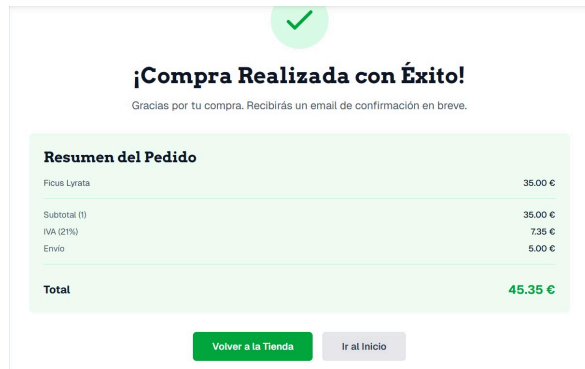

- VAT (21%): 7.35 €
 - Shipping: 5.00 €
2. Proceed to the final confirmation page.
 3. Check the Total displayed in the order summary.

Actual Result

The total shown is 45.35 €, which does not match the sum of the subtotal, VAT, and shipping. The correct calculation should be:

- Subtotal: 35.00 €
- VAT: 7.35 €
- Shipping: 5.00 € Total real: 47.35 €

The system is undercharging by 2 €.

Expected Result

The total should correctly reflect the sum of all components: 35.00 € + 7.35 € + 5.00 € = 47.35 € The order confirmation must display the accurate final amount.

Additional Information:

Browser Chrome and mobile

I really like your website and the variety of plants you offer. I'm looking for advice on choosing species suitable for a bright balcony that gets some wind. I'd also love to know what basic care you recommend to keep them healthy throughout the year. Thank you for your help.

¿Tienes alguna duda sobre el cuidado de tus plantas o sobre un pedido? Rellena el formulario y te responderemos lo antes posible.

¡Mensaje enviado con éxito!
Gracias por contactarnos. Te responderemos lo antes posible.

Expected Result

Non-numeric characters should be rejected as invalid phone numbers.

Submission should be blocked until the user enters a valid numeric phone number or clears the field.

Additional Information:

Browser Chrome and mobile

KAN-
17
Contact
Page -
Phone field
accepts
incomplete
prefix (+34)

Steps to Reproduce

1. Open the contact form.
2. Locate the optional Phone field.
3. Enter the value +34 (prefix only, without any digits).
4. Click Submit.

Actual Result

The form accepts the value **+34** without showing any validation error and allows the submission to proceed

I really like your website and the variety of plants you offer. I'm looking for advice on choosing species suitable for a bright balcony that gets some wind. I'd also love to know what basic care you recommend to keep them healthy throughout the year. Thank you for your help.

Expected Result

A phone number consisting only of a prefix should be rejected as incomplete.

The form should block submission until a valid phone number is entered or the field is cleared.

Additional Information:

Browser Chrome and mobile

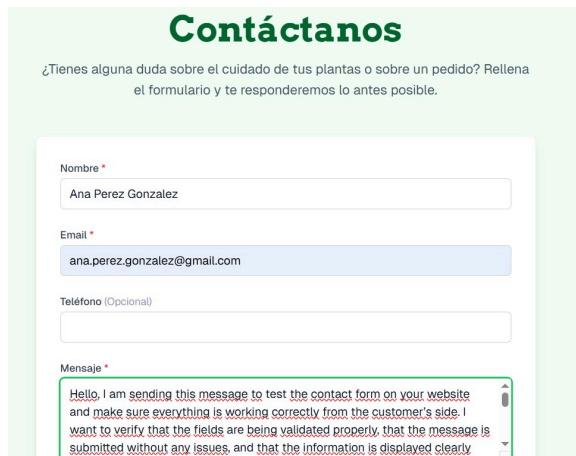

KAN-16 Contact page - Message field allows more than 500 characters and the form is submitted successfully.

Steps to Reproduce

1. Open the contact form.
2. Enter a message longer than 500 characters.
3. Fill in the remaining fields with valid data.
4. Click "Submit".

Actual Result

The form is submitted successfully even though the message exceeds the character limit.

Expected Result

The form should block submission and display an error indicating that the message exceeds the maximum allowed length (500 characters).

Additional Information:

Browser Chrome and mobile

KAN-15 Contact page - Email field accepts invalid email formats and the form is submitted successfully

Steps to Reproduce

1. Open the contact form.
2. Enter an invalid email (e.g., anagonzalezperezgmailcom).
3. Fill in the remaining fields with valid data.
4. Click "Submit".

Actual Result

The form is submitted successfully with an invalid email.

The screenshot shows a contact form titled "Contáctanos" with the subtitle "¿Tienes alguna duda sobre el cuidado de tus plantas o sobre un pedido? Rellena el formulario y te responderemos lo antes posible." The form fields are: "Nombre *" (filled with "Ana Pérez González"), "Email *" (filled with "anaperezgonzalezgmailcom"), "Teléfono (Opcional)" (empty), and "Mensaje *" (filled with a paragraph of text). A green border highlights the "Mensaje *" field.

The screenshot shows the same contact form titled "Contáctanos" with the subtitle "¿Tienes alguna duda sobre el cuidado de tus plantas o sobre un pedido? Rellena el formulario y te responderemos lo antes posible." Below the form fields, a green box displays the message "¡Mensaje enviado con éxito!" and "Gracias por contactarnos. Te responderemos lo antes posible."

Expected Result

The form should block submission and display a validation error indicating that the email format is invalid.

Additional Information:

Browser Chrome and mobile

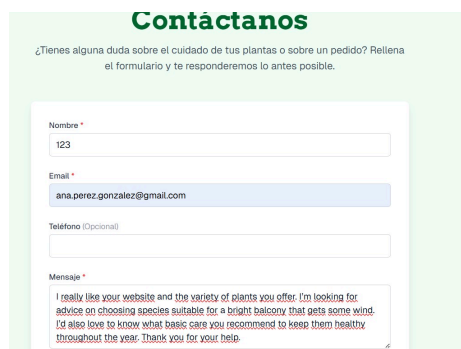

KAN-14 Contact Page -Name field accepts invalid characters (e.g., only numbers) and the form is submitted successfully.

Steps to Reproduce

1. Open the contact form.
2. Enter only numbers in the *Name* field.
3. Fill in the remaining fields with valid data.
4. Click "Submit".

Actual Result

The form is submitted successfully with an invalid name.

The screenshot shows a contact form titled "Contáctanos" with the subtitle "¿Tienes alguna duda sobre el cuidado de tus plantas o sobre un pedido? Rellena el formulario y te responderemos lo antes posible." The form fields are: "Nombre *" (filled with "123"), "Email *" (filled with "ana.perez.gonzalez@gmail.com"), "Teléfono (Opcional)" (empty), and "Mensaje *" (filled with a paragraph of text).

Expected Result

The form should block submission and display a validation error indicating that the name field contains invalid characters.

Additional Information:

Browser Chrome and Mobile

KAN-13
Contact page - the form can be submitted even when the email field is left empty

Steps to Reproduce

1. Go to the Contact page.
2. Leave the *email* field empty.
3. Fill in the remaining required fields.
4. Click "Submit".

Actual Result

The form is submitted successfully even though the email field is empty.

Expected Result

The form should prevent submission and display a validation message indicating that the email field is required.

Additional Notes

- The rest of the form validations work correctly.
- For example, if the user enters a **name** and an **email**, but leaves the **message** field empty, the form correctly displays the validation error and does not submit.
- The issue appears to be isolated to the **email field**, which allows submission even when left empty.
